I kept learning the piano, which I do not like.
See the end of my story

"Well, it is good to hear your thought. I see you have tried to learn the piano. I will not force you anymore. As a compensation, I will buy you a guitar that you like! Make sure you practice a lot!
"Mom, I think I still want to learn the guitar! I just not have any interest with piano. I am sorry."
Mom realizes her problem. She should not force her kid to do something that he does not want. Mom start to support me to play the guitar.
✨Get the good guitar!
